

Propell'art

Based in Sydney's eastern suburbs, Propell'art selects vintage propellers from around the world and turns each of them into a collectible piece of art.

Through unique and original designs, Propell'art gives vintage airplane blades a second life, paying tribute to a long aeronautical history.

Each propeller is carefully selected - boasting many hours of flight; they have been used on planes from the 50's, 60's and 70's, a time when aviation was synonymous with freedom and conquest.

The propellers are modified in our own design studio. Produced in limited series, each design can be customized and mounted on a variety of bases.
